

Dear Friends at Farmingdale United Methodist Women,

In the second half of 2019, you graciously funded a portion of charity: water's work in India as a Water Project Sponsor. Lives have been transformed by your generosity! We're honored to share your impact in the following Completion Report.

100% of your generous donation funded 12 Piped System Tap Stands for people living in India.

Thanks to you, we're one step closer to making sure every person on the planet has access to clean and safe water. Your donation was part of a \$1,124,989.84 grant that funded 2,630 projects and brought clean water to 14,284 people!

People like Dangini.

Dangini is a wife and mother of two sons. Before Gram Vikas partnered with her community to construct sustainable water points, her region struggled with high rates of diarrheal and skin diseases. Many families didn't have their own latrines for safe hygiene practices, leading to contamination of available groundwater. Dangini reported, "We had to wake up at 5am and walk over half a mile to use the bathroom." Most of her time was spent collecting water, which was especially dangerous during the rainy season. After investing in a piped system with household water points, everything changed. Finally, women had time to thrive; some even planted gardens. "We are grateful to have water in our homes," said Dangini.

As a Water Programs Senior Manager at charity: water, I am honored to oversee our partnership, implementation strategy, and commitments in India. I witness the life-changing impact of clean water every day— transformation you empower through your incredible generosity. Clean water brings health to communities once weakened by disease, gives children access to the education they deserve, and restores families' hope in the future through economic empowerment.

Your kindness is rewriting stories for families in India. Thank you.

Sincerely,

Stephanie Goetz
Water Programs Senior Manager, charity: water
